

Net Metering Guide

What Is Net Metering

Net metering allows a solar system owner to export surplus electricity to the grid in exchange for a bill credit, using a bi-directional meter that records both imported and exported units.

Application Process

- Submit application with CNIC, latest bill and technical system details
- DISCO technical feasibility review
- Site inspection by DISCO representative
- Net metering agreement signing
- Bi-directional meter installation

VOX Energy's Role

VOX Energy manages the entire net metering documentation and DISCO liaison process on your behalf, from initial application through to final meter installation.

Disclaimer

Net metering policies and timelines are set by NEPRA and individual DISCOs and are subject to change. This guide is for general informational purposes only.
